Ġ

Claims 6 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 6 and 9 are indefinite because the Markush grouping is improper because "ceramics and glass" are not mutually exclusive groups in said grouping when compared to the other groups (i.e. silica, alumina and ceria). Other language should be used to define the hard particles.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103 (a) as obvious over Nishimoto et al.

The reference teach in column 5, line 13-column 7, line 10, column 15, lines 9-19, column 16, lines 59-60 and column 19, lines 5-10, a polishing slurry comprising organic/inorganic composite particles and a dispersant, wherein the composite particle comprise first particles (polymer) and a plurality or second particles (hard particles) attached to the surface of the first particle, said first particle being larger than the second particles. The reference defines sizes for the first and second particles (i.e. broad range of 0.005-5 microns) and the size

Application/Control Number: 10/629,206

Art Unit: 1755

ratio. The second particles are attached to the first particles by way of a compound that is obtained by hydrolysis of a silane.

Although the reference does not literally state that a metal oxide membrane attaches the particles, it is the examiners position that since the reference states that the second particles are attached to the first particles by way of a compound that is obtained by hydrolysis of a silane, this encompasses and therefore makes obvious the claimed limitation because a metal oxide solution will be formed by this absent evidence to the contrary (instant specification on page 3, first paragraph, defines this).

With respect to the size, the reference defines size values, size ratio and states that said first particle is larger than the second particles. In view of these teachings and from calculation of the sizes by using the ratio defined, the claimed sizes are broadly encompassed by the reference and therefore the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the range disclosed by the reference because overlapping ranges have been held to be a prima facie case of obviousness, see *In re Malagari*, 182 U.S.P.Q. 549; *In re Wertheim* 191 USPQ 90 (CCPA 1976)". Although the limitation of instant claim 2 is not literally defined, it is the examiners position that since the polymers (of claims 3 and 4) are the same, they are expected to have the same characteristic absent evidence to the contrary.

In view of the teachings as set forth above, it is the examiners position that the references reasonably teach or suggest the limitations of the rejected claims.

Application/Control Number: 10/629,206

Art Unit: 1755

Claims 7 and 8 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

"A reference is good not only for what it teaches but also for what one of ordinary skill might reasonably infer from the teachings. In re Opprecht 12 USPQ 2d 1235, 1236 (CAFC 1989); In re Bode USPQ 12; In re Lamberti 192 USPQ 278; In re Bozek 163 USPQ 545, 549 (CCPA 1969); In re Van Mater 144 USPQ 421; In re Jacoby 135 USPQ 317; In re LeGrice 133 USPQ 365; In re Preda 159 USPQ 342 (CCPA 1968)". In addition, "A reference can be used for all it realistically teaches and is not limited to the disclosure in its preferred embodiments" See In re Van Marter, 144 USPQ 421.

"A generic disclosure renders a claimed species prima facie obvious. Ex parte

George 21 USPQ 2d 1057, 1060 (BPAI 1991); In re Woodruff 16 USPQ 2d 1934; Merk & Co.

v. Biocraft Lab. Inc. 10 USPQ 2d 1843 (Fed. Cir. 1983); In re Susi 169 USPQ 423 (CCPA 1971)".

Evidence of unexpected results must be clear and convincing. *In re Lohr* 137 USPQ 548. Evidence of unexpected results must be commensurate in scope with the subject matter claimed. *In re Linder* 173 USPQ 356.

The references cited on the 1449 have been reviewed by the examiner and are considered to be art of interest since they are cumulative to or less than the art relied upon in the above rejections.

Art Unit: 1755

Any foreign language documents submitted by applicant has been considered to the **extent of** the short explanation of significance, English abstract or English equivalent, if appropriate.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A Marcheschi whose telephone number is (571) 272-1374. The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark L Bell can be reached on (571) 272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (coll-free).
